

Jitka Stilund Hansen, MS, Ph.D.

[ORCID](#)

I am working with research data management, developing projects, tools and services at the [Library](#) of the Technical University of Denmark.

I am a biologist, and have performed research in toxicology, occupational and public health. I have a profound interest in improving the quality of research. This has moved me from developing relevant *in vivo* and *in vitro* models of human exposure and disease to my current engagement in research data management and implementing the FAIR principles in my organisation.

Here you can watch the three videos about Citizen Science produced for the project presented in my poster:

[Introduction to Citizen Science](#)

[FAIR data in a Citizen Science project](#)

[About the Ten Principles for Citizen Science](#)
