## FAIR Research Data Management plans for Open Science

Justine Vandedorpe, Leyla Garcia, Birte Lindstaedt, Ursula Arning, Dietrich Rebholz-Schuhmann

Contact: lindstaedt@zbmed.de

- Improving the research data infrastructure for Life Sciences
- Join forces with research groups to create information services and standards for Open Science
- Integrate user requirements fulfilling their needs

- Linking literature and research data
- Testing and developing new tools as a service for Research Data Management
- Providing consultancy and advise to researchers for FAIR data management

Strategy

Service development within the framework of the National Research Data Infrastructure (NFDI)

Data librarians participation and support for research projects in Life Sciences

Adoption and implementation of the FAIR principles
